Transmission

Tellus

We, we could fall off the earth
Between the sheets I know
I?m having trouble sleeping
Been counting sheep
I think I?ll miss your supple heart the most
Feel free
To push me first
How else am I supposed to know?
And your words have been foreseen
So let?s take a moment dear
Just to find some room to breathe
But your lips, they feel?

And we, we could fall to the floor
Between your thighs I know
This lifestyle has been sleeping
Been counting hours
Until the clouds become thick smoke
Let?s just fall... [x3]
And your words have been foreseen
So let?s take a moment dear
Just to find some room to breathe
And your words have been foreseen
So let?s take a moment dear
Just to find some room to breathe
