Facemelt

Kj-52

Unbuckle seatbelt, same to the waist belt
You say I'm sick, I need a Vix, I need a DayQuilt
Hotter than a fever, can't stay still
I don't need an E-pill, just need a refillI'm the kinda heat that'll make the make the place melt
Got the nebula, for your spaceship
Last time, init, init, init, make the place melt
Feeling like it's burning up, now you know how they feltI know what you came for
But please, please be careful
My little daredevils
We might as well jumpThis the kinda beat, that'll make your, make your facemelt
Make your facemelt, make your, make your facemelt
This the kinda beat, that'll make your, make your facemelt
Make your facemelt, make your, make your facemelt
Make your make your facemelt!
