Absent Elements

Finger Eleven

Everyone plays along
Get them giving or steal the life they're breathing
They'll grow sickened
Take their secret codes and signals
Discover all they know
Keep up the pace now until it all dries upYou'll never find out now
That all these absent elements
Build your comfortable defense, stronger still
Like an emptinessWay too early to consider losing
Vacant staring
May discover some reflection
Or may discover none
Just think what you've done
And watch it all add upYou'll never find out now
That all these absent elements
Build your comfortable defense, stronger still
Like an emptiness, you'll never fillIf all these absent elements
Build your comfortable defense, stronger still
Like an emptiness, you'll never fill
You'll never fill, you'll never fill, you'll never fillYou'll never find out now
That all these absent elements
Build your comfortable defense, stronger still
Like an emptinessYou'll never find out now
That all these absent elements
Build your comfortable defense, stronger still
Like an emptiness, you'll never fillYou'll never fill, you'll never fill, you'll never fill
