

No More

Two Spot Gobi

Time over takes time
We're almost listening
never whispering now
I know I see

That time over takes time
I see the changes at different stages
I know I see

That you were the one
But now I know that i'm not holding on for any other reasons
I dont worry no more

And now that I see no excuses for
What has gone before this was all that I knew
and now that you say that we're not the same
in any way, well anyway I dont worry no more

No more tears, no more lies
no more keeping things inside
no more words no more pain
I feel like I can breath again

And time over takes time
and you're a mystery look whos listening now
Now now ow-ow

And I cant believe
its taken everything to realise where it is that we are moving
I dont worry no more

And now that I see no excuses for
What has gone before this was all that I knew
and now that you say that we're not the same
in any way, well anyway I dont worry no more

You call me I come and you call
but I cant get back no more
You call me I come and you call
but I cant get back no more

You call me I come and you call
but I cant get back no more
Get back no more

Well You call me I come and you call
but I cant get back no more
You call me I come and you call
but I cant get back no more
You call me I come and you call
but I cant get back no more
Get back no more

And therell always be a part of me that you can see and think that you know
Therell always be a part of me that you can see and think that you know
Therell always be a part of me that you can see and think that you know
Nooooo

And now that I see no excuses for
What has gone before this was all that I knew
and now that you say that we're not the same
in any way, well anyway I dont worry no more

In any way cos'now that I see no excuses for
What has gone before this was all that I knew
and now that you say that we're not the same
in any way, well anyway I dont worry no more

No more tears, no more lies
no more keeping things inside
no more words no more pain
I feel like I can breath again...
