

# Volcano

## The Presidents Of The United States Of America

Under the island, middle of a mountain  
There is a big bad, boomin' system  
Blowin' speakers, woofers and tweeters  
Amplifiers, melted wires  
The parties exploded, the core is corroded  
Under ground, the Puget Sound  
'Cause a shiftin', and a drifin'  
Big black boom box, stuck in the hot rock  
It's in there flowin', it's in there growin'  
You don't believe me, that this scenery  
Could be a cold blooded killer

It's gonna blow... Volcano  
It's gonna blow... Volcano  
It's gonna blow... Volcano

Now the island is shiftin', the plates are liftin'  
The core is creamy, docile and dreamy  
Stopped up and steamy  
Happy campers, poop in there pampers  
When the mountain, becomes a fountain  
Of white hot lava, molten magna  
Super sonic, plate techtonics  
Stereo phonic, lava and tonic  
The boom is bionic  
Sony shut down, magnavox meltdown  
Ballistic breakdown  
Hi-fi heatwave, lo-fi lava cave  
That sulfur smells, Mt. St. Helens  
Pompeii was yellin',

It's gonna blow... Volcano  
It's gonna blow... Volcano  
It's gonna blow... Volcano  
It's gonna blow... Volcano
