

# Can't Live Without You

## Technotronic

I can't live without you, just can't live without you  
I can't live without you I can't live without you, just can't live without you  
I can't live without you  
I can't live without you, just can't live without you  
I can't live without you I can't live without you, just can't live without you  
I can't live without you, just can't live without you We will never know if our love's for sure, it's our destiny  
Look within the sky, let your mind just fly and feelin' free  
Trust within yourself, trust in no one else, the way it should be  
Look within your heart, plays the greatest part, I know I can't live without you, just can't live without you  
I can't live without you  
I can't live without you, just can't live without you  
I can't live without you  
I can't live without you Many times we fight, then make love all night, the way it should be  
Here's a toast to you, that's for being true, so true to me  
We've had a sit-down just what we're feeling now, to keep us strong  
Remember how it was when we fell in love, so beautiful I can't live without you, just can't live without you  
I can't live without you, just can't live without you Living  
Living I just can't live without you  
But I keep on movin' on 'cause I have to  
Stay in touch with my feelings  
Just keep on rather than feelin' Now I'm chilling on the lighter plain  
I met a girl and she wanted to hang with me  
Because I have the key to her heart from the very start She move it up, she say let's sit down and funk it  
When I jump up out of my seat  
'Cause there was something she said I wouldn't care to repeat I just can't live in a dream  
But I keep on movin' on 'cause I have to  
Stay in touch with my feelings  
Just keep on rather than feelin' You're breaking by heart  
Yeah, yeah I can't live, I can't live, I can't live, live without you  
I can't live, I can't live, I can't live, live without you I can't live without you, just can't live without you  
I can't live without you  
I can't live without you, just can't live without you  
I can't live without you  
(I can't live without you) I can't live without you, just can't live without you  
I can't live without you  
(I can't live without you)  
I can't live without you, just can't live without you  
I can't live without you  
(I can't live without you) I can't live without you, just can't live without you

I can't live without you  
(I can't live without you) I can't live, I can't live, I can't live without you  
I can't live, I can't live, I can't live without you
