

# Where's The Party

[Jimmy Buffett](#)

Every night the stars come out to light another town  
Just because I'm lonely doesn't mean that gets me down  
I cruise the local drive-ins watchin' lovers holdin' hands  
Like movie stills of Coupe De Villes and Japanese Sedans  
Where's the party? Where's the party?  
Everybody I know say they expect me to go to the party  
Sometimes I wish the radio would learn another song  
I'd stay at home and watch TV if there was somethin' on  
Ooh, but why should I get all dressed up when there's no place to go  
Still everybody looks at me as if they think I know  
Where's the party? Where's the party?  
Everybody I see say they expect to see me at the party  
I could stay here all night long, wait for her to call  
Or I could put my walkman on and never care at all  
Still every night the stars come out to light another town  
And just because I'm lonely doesn't mean that gets me down  
Where's the party? Where's the party?  
Everybody I know say they'd expect her to show at the party
