This Song

Chester See

It's too much
there's no time
takes too long
it's not my fight
it's easier to turn away

It's too hard
not my fault
don't understand
or care to find out
it's easier to turn away

But Time leaves us wondering where she went
and I wanna change the way she's spent

so this song's for me
this song's for you
this song's for everyone that knows just what
this world is going though
this song's for us
this song's for them
this song's for everyone that wants to do
all the things we've said but we never did

words and words I've said before
fervor dies and I ignore
the things that I thought I cared for
am I real at all?

pretend to love or love pretends
to be all we need like Lennon said
but only if when in the end
it's more than just these words

But Time leaves us wondering where she went
and I wanna change the way she's spent

so this song's for me
this song's for you
this song's for everyone that knows just what

this world is going though
this song's for us
this song's for them
this song's for everyone that wants to do
all the things we've said but we never did

But Time leaves us wondering where she went
and I wanna change the way she's spent

so this song's for me
this song's for you
this song's for everyone that knows just what
this world is going though
this song's for us
this song's for them
this song's for everyone that wants to do
all the things we've said but we never did

We never did
we never did
we never did
we never did
