Together

Blue Rodeo

We can fight and argue all night
And I'll sing my blues
And you'll sing yours too
Cause no one's giving in
No one's even listening
To tired old words
But we sure know how to hurt each other
Each otherWe'll sharpen our knives
And aim for the heart
I know all my lines
And you know your part
But then after all the tears
You fall asleep in my arms
And then I realize this is all that I want together
TogetherI know we're a mess
Just like all the rest
So let's just be
And with time we'll see
If it's written in the stars up above
Like everything you want but can't get enough of
If I can mend this golden thread
That keeps us joined
Together
