## **Near You**

## Tammy Wynette;George Jones;George Jones & Tammy Wy

I should get out of this seat Feel the world beneath my feet Strive to see more of the sun Try to change what I've become Move on up through this down Take this luck and turn it around I get near you but I never seem to reach you I get near you but I never seem to reach you, reach you Somewhere tonight the stars still shine Somehow I've got to re align Fueled by the promise of the sun Pulled by the charm this night has spun Move on up through this down Take this luck and turn it around I get near you but I never seem to reach you I get near you but I never seem to reach you, reach you I get near you but I never seem to reach you I get near you but I never seem to reach you, reach you Reach you, reach you, reach you
