Kylie Minogue

It's night time
We're driving
Lights go by make stars in my eyes
It's cold out
And it's warm in
When I had you by my side
And I want this
It's special
When the breeze is on my face
For now and for always
I'll dream about this time and place
This is the feeling I want for always
This is the feeling I want for always
Free
So free
It's special
The feeling
Really nice, nice and new
Something
To believe in
We'll do whatever we choose
And I want this
It's magic
On the road to God knows where
For now and for ever

I'll dream about this time we shared
This is the feeling I want for always
This is the feeling I want for always
Free
So free
Free
So free
(Scream)
This is the feeling I want for always
This is the feeling I want for always
This is the feeling I want for always
This is the feeling I want for always
Free

So free
Free
So free
Free
So free
