Architecture

Junior Battles

Natural order of things
The first lie and farewell kiss
Homo sum et nihil humanum
Nylon, plastic uranium, plutoniumBreathe in
Breathe outIn the basilica of the human body
Obey the law of flesh ever burning
Ten commandments of oxygen and carbon
Entombed in a pyramid of skin
Communicating vessels, acid, electricity
What a useless mechanismBehind the walls of protein prison
Crowned with barbed wire of DNA
Imprisoned is this piece of shitAre we indeed fingerprints of God?
Zero one zero zero one...
Ashes to ashes, dust to dust
One one zero one zero one...A human being
What a shame
I think therefore I am
What a waste
