

She Likes It In the Morning

Clay Walker

And she likes it in the morning
And I run my fingers through her hair
And she smiles when I call her darling
She looks like a angel laying there And she wants me in the evening
To listen close to how she feels
She needs to know I need her
And Heaven knows I always will 'Cause she loves me every single day and night
And she says we are everything that's good in her life
She says she loves me more than anything on earth
And that's almost as much as I love her She likes to lay down on me
And rest her head on my chest
And softly whisper to me
What she won't share with anyone else And there's a sweetness in her laughter
When it's just the two of us
And I try so hard to capture
Every little thing she does 'Cause she loves me every single day and night
And she says we are everything that's good in her life
She says she loves me more than anything on earth
And that's almost as much as I love her And she says she loves me more than anything on earth
And that's almost, almost as much as I love her And she likes it in the morning
