

Without My Heart

Tyrese

Someone call a doctor, hurry please
There's an empty space where my heart's supposed to be
'Cause my girl left and she took it with her
So I'll stop at nothing to get her
And I don't have much time left
It's like I just took my last breath
The room is dark and the temperature is getting low
The doctor said I'm suffering from a lack of love
Come back 'cause I don't wanna fall apart
I can't live without my heart
No, I can't leave without my heart
Now you got me tripping 'cause
I give you life support in your time on need
So how could you turn around and pull the plug on me
You're the only thing I ever knew about love
Girl I can't live without you
Mistakes are had but my blood pressure's getting low
My body seems to get weaker every time you go
I risk my life baby just to save us
'Cause I don't stand a chance if I'm not with ya
And I know it's my fault but I'm not prepared to take this loss
The room is dark and the temperature is getting low
The doctor said I'm suffering from a lack of love
So come back 'cause I 'm about to fall apart
I can't live without my heart
Now you got me tripping 'cause
I give you life support in your time on need
So how could you turn around and pull the plug on me
You're the only thing I ever knew about love
Two fingers on my neck tryna find my pulse
And now I'm struggling to breathe 'cause the pain done collapsed my lungs
I know one day that we all gotta leave from here
But I'm way too young and my love's not done
Shock me back to life and give me another try
I can't live without my heart
No I can't live without you
