

I Know

Izzy Bizu

Tell me baby, step a little closer, step a little closer
Take my hand, follow my feet and follow my lead
Now we're too young to deal with defeat, I want you to feel joy
He took him away and left you astray
All alone, all alone, oh, I sit in the room with your knees right up to your chest
Come on baby, oh I follow you Oh, let me be your remedy
I'll take you out of your misery I know, I know you more than you know yourself
You know, you know it's okay to enjoy yourself
I know, I know you more than you know yourself
You know, you know it's okay to enjoy yourself
Tell me baby, you feel a little down, a little lost
Tell me baby, you feel a little down, a little insecure
You feel insane, yeah you wanna lash out,
hit your head on the wall now I'm your lady
If your eyes wanna rain, I'll let the tears fall
You can't drive, you can't drive this late at night
Cause I worry about you love
Come on baby, oh i follow you Oh, let me be your remedy
I'll take you out of your misery I know, I know you more than you know yourself
You know, you know it's okay to enjoy yourself
I know, I know you more than you know yourself
You know, you know it's okay to enjoy yourself
Something is in this world we can't explain
Do you end up in the same place?
All of it together you keep saying and
think so nobody gets your pain
You like the? and I'll wait outside
Ooh, ooh I know, I know you more than you know yourself
You know, you know it's okay to enjoy yourself
I know, I know you more than you know yourself
You know, you know it's okay to enjoy yourself
