# Stars

## Naomi Daniel

Up in the sky stars twinkle fall and shine
Over a million years old
There's something more than you've been told

Up in the sky stars are there all the time
Through the day and in night
From dawn to way past midnight

Stars have seen more than you can imagine
More than you could ever dream
If you listen hard enough
You'll hear what this life mean
Stars know more than you think
Stars don't just shine and blink
Stars for eternity
Stars chart our destiny
Stars count them one by one
If you think that is fun
Stars there are even more
Than looking out your back door

Stars
Stars
Stars
Stars
Stars
Stars
Stars
Staa~rs

(Take some time to look up in the sky)

Up in the sky stars are like diamonds for the world
Hanging from an endlass strand
Too far away to hold in your hands

The milky way, the universe stretch here to there
They know right where they belong
Just make your wish before you're gone

Stars have seen more than you can imagine
More than you could ever dream
If you listen hard enough
You'll hear what this life mean
Stars know more than you think
Stars don't just shine and blink
Stars for eternity
Stars chart our destiny
Stars count them one by one
If you think that is fun
Stars there are even more
Than looking out your back door

Stars
Stars
Stars
Stars
Stars
Stars
Stars
Staa~rs

(Take some time to look up in the sky)

Ok, so we're talking about stars.
Can you believe there are as many stars in the sky as there are grains of sand on the earth?
Think about it. It's possible.
And oh I've heard stuff like oh baby baby, when I think about you I get stars in my eyes.
Oh baby baby. Oh baby.
Uh huh, yeah right.
And uh, there's the classic star song, Twinkle Twinkle Little Star
How I Wonder What You Are, Up Above the World So High
How'd you get there!
(huh ha ha)

And, hey look! There's Whoopi Goldberg and Ted Danson and Sinead O'Conner and Cindy Crawford and Janet Jackson and Kevin Costner and Denzelll Washington.
Mm hmm.
Well they're stars, right?
You admire them from a distance. You wish you could touch them, but they're juuust outta your reach.
Stars, right?

And from where we sit you got planets that look like stars,
and suns that look like stars
and stars that are well, just

Stars.

Right?

Stars.
