

# Break Those Chains

## A Telemetry

don't you know most people are asleep  
not knowing what to do with their lives  
they live in darkness to scared to break free  
from the doldrums surrounding thee

it's time to break those chains  
and move forward into the light  
the time is right for breaking chains  
the one's that?ll hold you tight

let me tell you the people who are awake  
will live in constant awe of it all  
they fill there lives with new beginnings  
and rise to the greatest heights

it's time to break those chains  
and move forward into the light  
the time is right for breaking chains  
the one's that?ll hold you tight

I know it can be tough sometimes  
in a world this cold  
just keep your head held high

and make your way  
through the dismal disarray

it's time to break those chains  
and move forward into the light  
the time is right for breaking chains  
the one's that?ll hold you tight
