

We Are The Undertakers

Hysterica

The lights around turn the rain that stopped
There is an echo in my crypt
You are so welcome even though you look strange
Just be quiet listen to my breath You are so cold
You are so still
I love you
I promise I will Who digs you up when you're down
Makes your head spin around
Even loves you when you're dead and cold
Who? It's your part in the place
Heavy smile on your face
Cares about you when you feeling down
We are the undertakers
What we have it's a love affair
You can give me any more than a week
I'll be with you every minute in love
I gotta have you one more time You are so cold
You are so still
I love you
I promise I will
Who digs you up when you're down
Makes your head spin around
Even loves you when you're dead and cold
Who? It's your part in the place
Heavy smile on your face
Cares about you when you feeling down
We are the undertakers Who? I said who?
Who? Will always love you?
