

# Let's Forget About The Stars

[Elvis Presley](#)

If you let the stars keep telling you who to love and not to love  
You may never find contentment for your heart  
You could go unloved forever and, darling, that means never  
Surrender to love, let's forget about the stars  
You say the stars have promised you true love ten thousand times  
But here you are with a broken heart and mind  
I can tell you want to love me from the beating in your heart  
Surrender to love, let's forget about the stars  
Let's forget about the stars, come follow me, my dove  
To a world just like the world that you've been dreaming of  
Let's not wait too long or something might go wrong  
Surrender to love, let's forget about the stars  
Let's forget about the stars  
Let's forget about the stars  
Let's forget about the stars
