

How You See the World

Coldplay

Are you missing something?
Looking for something?
Tired of everything
Searching and struggling
Are you worried about it?
Do you wanna talk about it?
Oh You're gonna get it right some time There's so much to be scared of
And not much to make sense of
Are you running in a circle?
You can't be too careful
And you can't relate it
'Cos it's complicated
Oh You're gonna get it right some time
You're gonna get it right some time It's how you see the world
How many times can you see?
You can't believe what you learn It's how you see the world
Don't you worry yourself
You're not gonna get hurt Oooohhhh... Is there something missing?
There's nobody listening
Are you scared of what you don't know?
Don't wanna end up on your own?
You need conversation
And information Ooooooooohhhh... Gonna get it right sometimes
You just wanna get it right sometimes It's how you see the world
How many times have you heard?
You can't believe a word It's how you see the world
Don't you worry yourself
'Cos nobody can learn Ooooooh
Ooooooh
Ooooooooooh That's how you see the world
That's how you see the world
