Untitled

Scarlet

The sky is falling on a TV screen. Mass hysteria for an American Dream.
This antichrist is coming to kill your young.
Armageddon well packaged and formatted for your TV screen.
Load your firearms because security is a warm warm gun.
Give us more desperation because it works for me.With fagged out politicians and pop star rape machines.
Give us more isolation because it works for me.
Give us more medication so we can run away from another day.
