

# Satellite (Live In Hammersmith, October 1982)

## Depeche Mode

Now hear this my friends  
I'll never be the same again  
Gonna lock myself in a cold black room  
Put a shadow over myself and a veil of gloom I will function, operate  
I will be a satellite of hate  
A satellite of hate Driving to this point by a chain of events  
Each one pushed me nearer the edge  
Gonna send my message through to you  
And you'll receive the signal too I will function, operate  
I will be a satellite of hate  
A satellite of hate, higher, higher Disillusioned, I was disenchanted  
Forgot the love that had been implanted  
Heard the lies and I felt the cold  
It broke my heart and I lost control Now I'm a satellite of instinct  
I'm a satellite of hate  
A satellite of hate
