

Make Light

Young Lyre

Cold in the May Sun
While you wait outside
Pushing your hair back
 Out of your eyes
 Promise to make up
 For the last few times I
 Blocked out the sunlight
To see you glow for just a while
 It won't be the last time
 And I won't stop trying

Hold on to me say, when'd you get so shyCause all I wanted to say

 Now that we're on our own
 Whatever got in the way

We have this nightI'll be holding your hair back
 If it gets to that

 You can draw me a straight line
 From your eyes to mine

I know they said when you're older

You could be anyone, you could be anything

 I don't know what else to say to you

I just hope they're rightCause all I wanted to say

 Now that we're on our own
 Whatever got in the way

We have this nightAnd all I wanted to say
 forever on our own
 Whatever happens today

We can both make lightI wanted to, you know I wanted to, you know I wish you could stay

 I want you to, you know I wish you could, you know I wish you could stay

 I wanted to, you know I wish you could, you know I wish you would stay

You know I wanted to, you know I wish you could, you know I wish you would stayI wanted to say,

 Now that we're on our own
 Whatever got in the way
 We have this night
 And all I wanted to say
 Forever on our own
 Whatever happens today
 We can both make light
