

# Just What They Told Me

## Treble Charger

I guess what concerns me the most  
Getting any younger so we like to boast  
Are the cracks and fissures splintering our lovely lives?  
Our acceptance of the shiny brand new kitchen knives  
So I have decided not to live that way  
I still behave in public  
And I don't confuse the night with day  
And I'm better off, please don't say  
We know you'll never live without  
You have to keep it out  
I pray that I'll be saved  
Before too long  
Another two or three days  
And I'll get it wrong  
A patch of thistle  
Measuring our early grave  
With waxy gleam  
We stroll along the colonnade  
And I have decided not to live that way  
I still behave in public  
And I don't confuse the night with day  
And I'm better off, please don't say  
We know you'll never live without  
You have no way to keep it out  
I did just what they told me  
I'm just trying to make my way  
I did just what they told me
