Patriotic Shock

Total Chaos

There's a problem with the government
When the government's mad
When the final solution comes
It would be rad
I don't care what the government's say
"cause it just don't matter now anyway
I don't know if the government's true
But the government's after you
I don't need no politicians
They always make the wrong decisions
Don't even know wrong from right
Starting wars they don't even fight
I guess what it is I'm trying to say
Is that government's don't matter now anyway
I don't know if the government's true
But the government's after you
