

Blue Jeans Pizza

[moe.](#)

I was thinkin' about your face just a minute ago
I'll be leaving the simple space just to be at a show
I get distracted by the simplest lies I'll need to test my resolve
I got the symptoms and I'm watching the signs
What medication can't solve Every problem lands to my front door
I ain't no Curious George
Perry Currie on a way past store
And now we're playin' at 'The Doors' I can remember the warm summer nights
Driving so fast we'd run every red light
I can remember feelin' is gone away Flying so high with my feet on the floor
I left my nerve on the ground
I made it this far using every back door
I had to find that new sound Took a lover like some Parisian Count
And then you fell off the blow
Spending summers with your seniors' discount
You pay your dues and you roll Cold trippin' at a rock 'n' roll show
What's the problem my friend?
Try slippin' past security at Moe
I guess you're showed out again I can remember the warm summer nights
Drinking cold gin he's got weed, get so tight
I can remember the feeling is gone again I can remember the warm summer nights
Driving so fast we'd run every red light
I can remember feelin' is gone away I can remember the warm summer nights
Drinking cold gin he's got weed, get so tight
I can remember the feelin' is gone again
