Breathe Today

Flyleaf

You try your hardest to perfect your explanations
You lie until they've run out of questions
You can only move as fast as whose in front of you
And if you assume just like them, what good will it do?
So find out for yourself
So your ignorance will stop bleeding through
Only one thing
Big enough to fill the void that's inside of you
It's just a breath away
You can breathe today
So many, lies swarming, around you, you're suffocating
The empty, shape in you, steals your breath you're suffocating
Logic forces me to believe in this and I've learned to see
And I can only say what I've seen and heard and only you can choose
And every choice you make will affect you, search your own self
You can breathe today
So many, lies swarming, around you, you're suffocating
The empty, shape in you, steals your breath you're suffocating
Big enough to fill the void that's inside of you
It's just a breath away
So many, lies swarming, around you, you're suffocating
The empty, shape in you, steals your breath you're suffocating
You can breathe today
Breathe today
