

# Sing to Me

## SOJA

I move along with my guitar, never goes away  
she is with me through the night and in the morning she stays  
I wash away like yesterday, float down the stream through all my ways  
she accompanies my steps in all my days  
she has six strings that I know just how to work and how to play  
we speak a language of our own every minute of the day  
we get along into the song  
I find her heart and I make it strong, and  
she backs me up when everyone has gone away, and  
she sings to me..(Trevor Young)  
she never goes very far  
she stays around no matter what I am doing  
she is there for me  
I know that she don't know the words  
I don't care, I kinda like it  
less the talking, a little more the melody  
she reaches out without a touch  
she knows that whatever I love  
ends up broken in the past and out the door  
I have broken her before I let her fall onto the floor  
I call it character and I love her more  
when she sings to me...
