Basic Brian

James

Rain, rain's floating down again
Surround your mind
Soft cloud, take me around again
On your rain
My dreams tell me everything
Surprise around
Call out your name
I need help again
For all love brigade
What you was, said is sure
Running on the seventh floor

Do it all, let it slide
Breathe yourself goodbye
See it all through the wall
Living outside again
Need a long way to go
Said you our escape
I died, when you fall again
Say out
I lied
I love feeling small again
All around, satisfied
