

Decom-Posers

Haemorrhage

Six feet down rot sets in
Putrefactive bacteria (Grows) under the marbled skin
Acid liquid liquids and enzymes are released
Self maceration by stale corpse fluidsDeteriorated corpse... by necrosis
Rebellious mass of grubs... Decom-posers!!!
Swarming maggots-spoiling the dead
Hungry insects worm-eaten brainMolten innards-fermented juices
Rancid carrion-munched into pulp
Sarco-blasters, larval plague
Maggots buzzing into the graveAshes to ashes, flesh to dust
Cadaver's turned into a pile of grubs!!!
Deteriorated corpse... by necrosis
Rebellious mass of grubs... Decom-posers!!!
