

Fire In the Rain

Agent Orange

Right from the beginning clouds began to form
We were all too young to fear the power of the storm
We had lost our hopes we knew our dreams would still remain
Because nothing is impossible nothing burns like fire in the rain
Fire in the rain Thunder rocked the mountains, lightning cracked the sky
No one that survived this hurricane would dare deny
If fate had played it's part there would be nothing to explain
What was once a very tiny spark is now a blazing fire in the rain
Fire in the rain, rain Now we see the sun coming out from behind the darkest clouds
Say goodbye to the storm as it moves across the sky
See the fire burning brighter than it ever has before
Move in close touch the flame burn like fire in the rain
Fire in the rain, fire in the rain, fire in the rain
