Sinners Who Believed

Jules Shear

She looks like someone you once knew
but every difference keeps on pulling at you
You just can't let good feeling show
You keep wondering
Where'd that other girl go?
And you know
that highway you've been on too many times
You're on again

All you sinners who believed in love
All you sinners who left it behind
All you sinners got it right through the heart
All you sinners who believed in love
All you sinners who believed in love

She looked at you with a cock-eyed grin
Someone you once got used to believing in
But what you wanted was a real wild beast
She wasn't gonna be that at least
And you know
that highway you've been on too many times
You're on again

All you sinners who believed in love
All you sinners who left it behind
All you sinners got it right through the heart
All you sinners who believed in love
All you sinners who believed in love

All you sinners who believed in love
All you sinners who left it behind
All you sinners got it right through the heart
All you sinners who believed in love
All you sinners who believed in love
