Don't Call It A Comeback

Motion City Soundtrack

We don't like endless cycles
Our take is more than meets the eye
That's our answer yeah, that's our answer
'Cause we don't care at all
Don't call it a comeback, no
This witness was injured and overthrown away
This time it's the last dance so come on
By will alone we set our minds in motion
We don't like endless cycles
Our take is more than meets the eye
That's our answer yeah, that's our answer
'Cause we don't care at all
Long winded the progress, oh
Setback after setback the need to play remains
Call it what you will somehow I know you will
And by will alone we set our minds in motion
We don't like endless cycles
Our take is more than meets the eye
That's our answer yeah, that's our answer
'Cause we don't care at all
I see that part of this has something to do with mediocre memory
This take is harder than the old and new combined
Head buried attack these manic men
Red glares from the color of outstretched hands get it higher
We don't like endless cycles
Our take is more than meets the eye
That's our answer yeah, that's our answer
'Cause we don't care at all
