Begin Again

Babyland

It started off so easily
Looking back now I can see what could have been
One simple chance
Begging Me
Begin Again
Push yourself to learn new ways to begin again
Do the wrong things
Activate
You must carry on
You can't relive what you were
You've used it and used it and not it is all gone
I know what you're missing
Face where you are
You're not young anymore
Tomorrow won't go away
With your every decision some movement is made
Yesterday was a loss
You turned the key now take care of business
Push yourself to learn new ways to begin again
Do the wrong things
Understand
You have just begun
