

Keep Your Voices Down (Album Version)

Days Away

"Keep Your Voices Down" I'd rather die
than need this
if I could just hold off tonight
by tomorrow you'll be gone
and ill be alright on my own But no, no, no just isn't possible
no, no it isn't possible Just sit back and relax
but don't worry I've
never been one to take too much
but I'll be the first to say this is crazy But if its everything i'll ever need
it's everything i'll ever need Just keep your voices down
cant you see theres other people trying to sleep in this town
but you still get your thrills from
coffee and pills and
they complain about the noise we make But no, no, no just isnt possible
no, no it isnt possible Sit back and relax
but don't worry I've
never been one to notice much
but I'll, ill be the first to say
this is crazy Oh no, theyre not listening
They'll never know what happened
Let go
There's no problem here
We're not hiding anything So sit back and relax, dont worry
I've never been one to notice much SO sit back anf relax, dont worry
Ive never been one to notice much
But I'll, I'll be the first to say
This is crazy But if it's everything I'll ever need
Well then its everything I'll ever need
