

# There's Something Special

## Pharrell Williams

There's something special on the other side of this moment  
(Moment, moment, moment)  
And it's about what you and I decide  
(Decide, decide, decide)  
And it's important for you to remember we did this together  
(Together, together, together)  
And finally, they'll know the story of our lives  
(Lives, lives, lives)I'm a sinner  
Sometimes I only did what was required  
I'm a sinner  
Sometimes I sat down when I got tired  
Should've stayed standing up  
To do the job for which I was hired  
But the good Lord  
Thank you for relighting my fire  
Grab someone you love  
There's something special on the other side of this moment  
(Moment, moment, moment)  
And it's about what you and I decide  
(Decide, decide, decide)  
And it's important for you to remember we did this together  
(Together, together, together)  
And finally, they'll know the story of our lives  
(Lives, lives, lives)There's a brush fire  
TV's watching it escalate  
Smoke signals going up (read the signs)  
It'll take your breath away  
But they don't know how we act now  
We'll turn our tomorrow into yesterday  
Don't you nest away  
C'mon, get dressed ok  
Dressed ok  
Grab someone you love  
There's something special on the other side of this moment  
(Moment, moment, moment)  
And it's about what you and I decide  
(Decide, decide, decide)  
And it's important for you to remember we did this together  
(Together, together, together)

And finally, they'll know the story of our lives  
(Lives, lives, lives) And if it happens to rain on my plans

Water and sweat will dry when they can

Not even cuffs will prevent this man

From the connection between these two hands

You heard me?

Yessir

And it's important for you to remember we did this together

(Together, together, together)

And finally, they'll know the story of our lives
