

Tenderest Moments (Acoustic Union Street)

Erasure

We go down to a foreign land
Dive through the clouds
You hold the guided light in your hands This must be all that there is
Times don't come much more beautiful You can show me places that my eyes have never seen
I'm following you, where are you taking me to?
You could be my angel who just walks out of a dream
I'm following you, where are you taking me to?
I have all faith in you
And these tenderest moments We circle low
Embrace the night as she draws us in
A holy shroud, a veil to hide our tenderest moments This must be all that there is
Times don't come much more beautiful You can show me places that my eyes have never seen
I'm following you, where are you taking me to?
You could be my angel who just walks out of a dream
I'm following you, where are you taking me to?
I have all faith in you
And these tenderest moments This must be all that there is
Times don't come much more beautiful You can show me places that my eyes have never seen
I'm following you, where are you taking me to?
You could be my angel who just walks out of a dream
I'm following you, where are you taking me to?
I have all faith in you
And these tenderest moments
