

# Shadow (feat. Trevor Young)

SOJA

I'm not a shadow,  
I'm not the ground beneath your feet  
I'm not a shadow,  
When you look down, you wont see me  
I'll stand up and I'll stand tall, I don't follow anyone  
I'm not a shadow, cause I'm not a shadow Here's to you don't settle, and never separate  
And never be quiet cause the words you say  
You never go back on and never turn around,  
Never judge another cause as stupid it sounds  
Cause when you see others knowin' they're all brothers,  
Knowin' they're all sisters, seein' the big picture,  
If they're not with you, then they're against  
And were here now when they are way back when  
So why try to please everyone?  
When it seems that all the people really want  
Is to show love, and out and get love back  
Is to show some faith and get respect  
Just look at the world then, you look at the problems  
And look at the hatred, and we still cant solve it  
So look inside and you'll find step one,  
Forget a diamond I'm shinin' like the sun Cause I'm not a shadow,  
I'm not the ground beneath your feet  
I'm not a shadow,  
When you look down, you wont see me  
I'll stand up and I'll stand tall, I don't follow anyone  
I'm not a shadow, cause I'm not a shadow Here's to you on your own, the innocent criminal  
You never fit the mold, you never go sit down  
You never go get approval no matter how you prove  
That love is the motive in everything you do,  
And revolution is you and you're against the machine,  
You know who you are and you know what I mean  
And when this record stops you would never slow down,  
When the video is over you want your turn now so,  
You make the truth and move straight ahead,  
While the followers behind you get left for dead  
For the imminent brainwash follow the dumb rules,  
Created by individuals who unlike you  
Don't care for the world or, care for the people  
They love it their way, and they love unequal

And they love when they feel above someone,  
I don't follow the leader when they're all wrongCause I'm not a shadow,  
I'm not the ground beneath your feet  
I'm not a shadow,  
When you look down, you wont see me  
I'll stand up and I'll stand tall, I don't follow anyone  
I'm not a shadow, cause I'm not a shadow
