Win or Lose

Randy

Wow, it came down upon us and it spread like the rats
I can't seem to remember saying okay to that
We're supposed to stand by and watch the swine grow fat
No way I would've agreed with thatWe shall have no other God than the new economy
But don't you believe there's gonna be room for you and me?
We must have found a way of making money for free
They call it alchemy, but I call it fucking robberyMaybe the sun will rise and the grass will grow
I just thought, I just thought I'd let you know
If this is only gonna be about win or lose, win or lose
Then may I please be excused?Well, it's here to take over, you may rest assured
Unless you make yourself heard, stand up and tell them to stop
But it won't be stopped easily
No, it won't even slow down for a little democracyMaybe the sun will rise and the grass will grow
I, I, I, I, I just thought I'd let you know
If this is only gonna be about win or lose, win or lose
May I please be excused?If we still don't recognize who's being used, who's being used
May I be excused?
