Push The Envelope

The Asteroids Galaxy Tour

Anyway you're OK, I'm away to the day when you wont pray for a better day.
Never say stay wide awake, be always late, for devils sake smile when you're afraid
In the gray, be a slave, everyday, create a wave, create your own fate
But you will fail, ...(the only line I cannot get)... lack the will, you'll be chasing your tail.
Push the envelope, wild child, come on x2
Come on x3
Now
Come on x3
Single mind, wastin' time, doin' fine most of the time, sure you walk the line

Make it shine, for the dime but always shines left behind there's no better crime
You will climb, until you find you sat in grime sublime,
But you decline, to the blind, I'll stay alive yeah ! I know you know that you're divine.
Push the envelope, wild child, come on x15
Sometimes you feel like you're running around in the clouds,
Sometimes you feel like you're living your life wasting time,
Oh you're so true yet so blue ~ is it all in your mind?
Tell me, amaze me, seduce me, you still make it mine.
Push the envelope, wild child, come on x4
