

Privacy

Blue

Every time I see you with that guy, it blows my mind

How someone like that could get a girl so fly

I could see it if he'd only treat you right

But he don't, so let's not trip on him tonight I don't really need the time to think about it

All I know is that you're here for me and that's it

In a minute you're gonna be right here, instead of there with him I can see that your body's reading my mind

Every move that you make is dropping on time

Baby, come on and dance with me and let the music play Turn the volume up

Listen, baby girl, I like your stuff

Come up close to me, I see

How we gonna get some privacy? Get on up

Listen, baby girl, you are the one

Think it's time for us to leave

Can we get some privacy? I don't know why and what it is you're tryin' to deny

'Cause when I look at you, I see it in your eyes

The way we fit together, you and me and you would know

If we could get some privacy I don't really need the time to think about it

All I know is that you're here for me and that's it

In a minute you're gonna be, right here, instead of there, with him I can see that your body's reading my mind

Every move that you make is dropping on time

Baby, come on and dance with me and let the music play Turn the volume up

Listen, baby girl, I like your stuff

Come up close to me, I see

How we gonna get some privacy? Get on up

Listen, baby girl, you are the one

Think it's time for us to leave

Can we get some privacy? I wouldn't go with him if I were you

'Cause anything you need I got it, I'm not just anybody

I'm gonna make your wildest dreams come true

And I don't wanna play with your emotions

Your love is my devotion now Now, right now, right now Turn the volume up

Listen, baby girl, I like your stuff

Come up close to me, I see

How we gonna get some privacy? Get on up

Listen, baby girl, you are the one

Think it's time for us to leave

Can we get some privacy? Turn the volume up

Listen, baby girl, I like your stuff

Come up close to me, I see

How we gonna get some privacy?Get on up
Listen, baby girl, you are the one
Think it's time for us to leave
Can we get some privacy?Turn the volume up
Listen, baby girl, I like your stuff
Come up close to me, I see
How we gonna get some privacy?Get on up
Listen, baby girl, you are the one
Think it's time for us to leave
Can we get some privacy?
