

# Recover

## Girlfrendo

Been torn apart  
Got so many scratches and scars  
Maybe they won't all go away  
But they'll fade  
Maybe time can mend us together again  
It's not what we've done but how far we've come

[Chorus:]  
We will recover  
The worst is over now  
All those fires we've been walking through  
And still we survived somehow  
We will recover  
The worst is behind and it hurts but in time I know that we will recover

Got so much to lose  
Seems I've lost my power to choose  
What to love and when to let go  
That all changed  
Get bitten once and then you're afraid  
What a waste  
Look what we've done  
How far we've come

[Chorus]  
Everybody's got their own reason to cry  
Everybody fights but not everyone survives  
Everybody searches, not everybody finds  
And I'm still in recovery, help me make it out alive

[Chorus]
