

# German. Jewish.

## Ghost Of The Robot

I'm German, you're Jewish  
How could we ever make it through this?  
I've got this problem, that seems to linger  
Everytime I find myself around your finger  
This would make more sence, in another time  
Not in America where we're westernized  
But if we were, what would I do  
What would I have said to what we've gone through?  
War won't stop me, I'm no Nazi  
That's why i'd never tell  
If you were fighting, surviving hiding  
Behind an old bookshelf  
I'm German, you're Jewish

How could we ever make it through this?  
I've got this problem, that seems to linger  
Everytime I find myself around your finger  
you've always been above, in some higher class  
i'm just a small rockstar, you're an actress  
what could i say, to ever prove to you  
that there can be a love between a German and a Jew?  
War won't stop me, I'm no Nazi  
That's why i'd never tell  
If you were fighting, surviving hiding  
Behind an old bookshelf...
