I Can Do Anything

Supersci

Phil buckle, john farnham, ross fraserYou can laugh, you think it's funny
Am I a fool, for taking the longest way
To reach for the skyI have my hopes, you have your business
Don't you see, it's somebody else's dream
That you're working forSo, what do you see
Just an ordinary man
What sets us apart, is this fire in my heart
That says, I can do anythingI lay awake, feel the distance
Sometimes I wonder, can I be the only one
Who's feeling this waySo you can't talk, or you can listen
Or you can walk away
We'll meet again
And you'll understandSo where you walk, I may not follow
I'm someone else, I'm going the only way I know
The right way for meSo, what do you see
Just an ordinary man
What sets us apart, is this fire in my heart
That says, I can do anything
