Safe Way Out

[Mike Dignam](#)

I don't know where to start
We're so close to ending everything
I've held your beating heart, full of cracks
but couldn't catch falling from my handsYou got the right to know what's going on
I won't lie, I'll only say it wrong
We've got to try before just giving up
I love you so muchWhere'd you want to go now, I don't see a way around
Where'd you want to go now, all I've done is let downI took fire escape
When the heat got to hot I ran away, such a selfish renegade
I'm ashamed I wasn't brave enough to sayYou got the right to question everything
I won't lie; we're sinking battle ships
We've got tonight before we call it quits
I love you so muchWhere'd you wanna go now, I don't see a way around
Where'd you wanna go now, all I've done is let you downIf it's hurting you then it's killing me
If it's hurting you then it's killing me
If it's hurting you then it's killing me
If it's hurting you then I don't want ta live a lonely life besides yaWhere'd you wanna go now, I don't see a way around
Where'd you wanna go now, all I've done is let you downNow there's nowhere left to fall cause the ground will crop it all
It's corrupted, our love just abandoned us,
Where'd you wanna go now, there's no safe way out
If it's hurting you then it's killing me
If it's hurting you then it's killing me
If it's hurting you then it's killing me
If it's hurting you then it's killing me
If it's hurting you then it's killing me
If it's hurting you then it's killing me
If it's hurting you then it's killing me
