God Loves You

Young Jules

In the quiet, love is reaching
It's yours to hold, be still and know that
Even when you're lost and lonely
And hope is gone, you're not aloneFar beyond the understanding
There's a hand that leads
If you believeThrough the darkness, see the light
Remember God loves youThe road ahead is long and winding
With eyes of faith, you'll find the way, yeah
And when the journey leaves you weary
You can rest in the comfort of Heaven's arms
Sweet loving armsAnd peace will follow
Peace be with you always as you go
For now you know thatThrough the darkness, there's a light
Remember God loves youWhen you open up your heart
His love will meet you where you are
He will always be a part of everything you do
He is here to set you free
And give you all the strength you need
To carry on, to carry onThrough the darkness, see the light
Remember God loves you
(Remember, remember)
Remember God loves you
