

# Time Goes On

## At Long Last

Imagine everything well see, the air is good here, come with me, the weight of my teardrops fragily  
As the condensation drips from my drink, it makes me stop, it makes me think, about us together,  
the time we ran through the rainy weatherThe closer here, the further away, Ill meet you here again some day  
The more I miss you, the more Ill say  
The lovely hours pass and fade, I really thought we had it made, where have these times gone?  
Time goes onWe could fight crime, but take our time, we got in trouble, but stayed in line  
I could tell it was destiny with your hand in mine  
The rusted busted guitar strings splinter, my heart is yours, yes you can enter  
Spring, Summer, Fall and Winter
