Sugababes

See my love is all I can give you
Nothing more 'cause life is how I wanted to be
With you and me
Staying together, yeah Take it all, I'm here boy
I got what you need here, talk to me
And help me breathe
I wanna hold on to sweet memories Wait for you to be there
All my life, I need
Someone to make me feel good
And I wish that it was you We break up and make it up
Back and forth we never stop
Every time a change of heart
I can't keep up When you say yes, then I say no
When it turns hot, we make it cold
But still something between us
Holds together Every journey in other side
Images always pass me by
Feel like leaving the walk behind
When I think of you Every moment I'm frightened is
Had to erase all your messages
Couldn't handle the things we said
Still I'm feeling you It's driving me crazy, baby
Lately you've been slipping away from me
I try to keep holding on, I cannot be wrong
There's something I didn't see We break up and make it up
Back and forth we never stop
Every time a change of heart
I can't keep up When you say yes then I say no
When it turns hot, we make it cold
But still something between us
Holds together Some time I lied to me
I think our time is over
And ain't it funny how sweet our dream
But the bed keeps on getting colder Sometimes when I close my eyes
It feels like I'm living by numbers
'Cause I've been holding you so damn tight
I gotta stop cos it's pulling me under It's driving me crazy, baby
Lately you've been slipping away from me
I try to keep holding on

I cannot be wrong
There's something I didn't see
We break up and make it up
Back and forth we never stop
Every time a change of heart
I can't keep up
When you say yes then I say no
When it turns hot, we make it cold
But still something between us
Holds together
We break up and make it up
Back and forth we never stop
Every time a change of heart
I can't keep up
When you say yes then I say no
When it turns hot, we make it cold
But still something between us
Holds together
