Psychotherapy

The Jezabels

Hail a cab
If you're only young
Psychotherapy
Owing at the turnLooking good now
Caught in angry youth, ooh
Love you babe
You're hotter than Peru, oohRaise your tab
I know what you're reaching for
Like members of a last of a dying world
Gone forever moreLeave tonight
I'll be there for you
There's not a star in the sky that's got a name
Which one are we going toI bleed on the west side of my mind
And it holds a mirror to yours
So tell me what's a boy like you
A boy like you,
Doing in a place like Mars?Look around you,
We don't have to wait: we've got it all
Leave the light on, even if you won't say you willWhat's a young boy like yourself doing in a place like this
On your own?
On your own?
All alonePlace like Mars, Place like Mars, Place like Mars
Place like Mars, Place like MarsLook around you
We don't have to wait: we've got it all
Leave the light on, even if you won't say you willWhat's a young boy like yourself doing in a place like this?
Leave the light on, even if... (say you will)
What's a young boy like yourself doing in a place like this?
Leave the light on, even if... (say you will)
