Shellfire Defense

Sodom

The cover of darkness no longer conceals
An approaching enemy
There are many ways to kick some ass
With updated technology
You will always get on your knees
In the war you're gonna fight
Prevent agreements between nations
No democracy but more genocideKeep your eyes open your under control
There is something that's over the top
Penetration and power sends bullets of lead
Inside your body to do the jobShellfire defense
Pray to god that he will take you in his hands
Shellfire defense
You wish to get the final shot
That makes your nightmare endEliminate the threat and minimise the risk
Supremacy against the attacks
New weapons in front of fighting troops
They get no chance for shooting back
Who gave you the criminal passions?
Inclinations to kill
Retribution demand victims
No matter what you feelKeep your eyes open your under control
There is something that's over the top
Penetration and power sends bullets of lead
Inside your body to do the jobShellfire defense
Pray to god that he will take you in his hands
Shellfire defense
You wish to get the final shot
That makes your nightmare endShellfire defense
Pray to god that he will take you in his hands
Shellfire defense
You wish to get the final shot
That makes your nightmare endLong vanished is the age of blows with a club
Wholesale murder guarantee
Soldiers within the meaning of law
Decimate the dregs of society
Where's man's dignity and human nature?
Disarmament and combination
Fit in with the needs of present

Peace not revelationKeep your eyes open your under control
There is something that's over the top
Penetration and power sends bullets of lead
Inside your body to do the jobShellfire defense
Pray to god that he will take you in his hands
Shellfire defense
You wish to get the final shot
That makes your nightmare end
